Artist Statement

Growing up I always enjoyed exploring new places and activities, and now that I have found my passion, this exploration has focused more on art and design. As a creative, I love to take inspiration from my surroundings, interests, and individuals. I like to explore others' creations and learn from them. My passion is to encompass different design elements and create something useful, communicative, and innovative. I am very organized and consider my design style to be clean and simple. I am somewhat of a perfectionist and I enjoy putting a lot of effort even into the smallest details. I enjoy tying in different concepts and symbolism into my projects, especially when they are personal projects. I believe that creativity is all around us we just have to seek it out and put it to work. Overall, my main goal as a designer and creative is to seek creativity and to spread joy to others through my designs.
